

# P-TECH

Pathways in Technology Early College High School

NFCSD

## WHAT IS P-TECH

P-TECH is a public education reform model focused on college attainment and career readiness. P-TECH schools span grades 9-14 and enable students to earn both a high school diploma and a no-cost, two-year postsecondary degree in a STEM field. Students participate in a range of workplace experiences, including mentorship, worksite visits and paid internships. Upon graduation, our students have the academic and professional skills required to either continue their education in a four-year postsecondary institution or enter into entry-level careers in Mechanical Technology. While the P-TECH Model encompasses six years, students are able to move at their own pace, enabling some to accelerate through the model in as little as four years. P-TECH serves all students regardless of background.

## SOME FACTS

- Video: [In Their Own Words](#) (2 minutes)
- P-TECH is NOT just 4 years of high school with 2 years of college added on to it.
- P-TECH integrates the best elements of high school, college, and industry. P-TECH enables students to begin their college and professional lives more quickly and with more support than the typical school-to-work pathway.

## WHY P-TECH

- High school diploma and college degree (at no cost) within 4, 5 or 6 years.
- Micro credential at the end of 12th grade + CDOS credential.
- First in-line opportunities for jobs with program business partner Stavatti Aerospace.

---

**9th Grade** - CFM 1, Accelerated Math and Science

**10th Grade** - CFM2, 1st college credit course

**11th Grade** - Potential to take up to 5 college credit courses

**12th Grade** - Job shadowing and Internships

---

1-2 Years After  
Students can earn their associates degree and be prepared to enter the workforce upon graduation!
