## ANSWER KEY

### Find the Mistakes

- a. There is a mistake in the way this math problem was solved.

$$\begin{array}{r} 5 \\ 27 \\ \times 8 \\ \hline 166 \end{array}$$

Solve the math problem correctly.

$$\begin{array}{r} 5 \\ 27 \\ \times 8 \\ \hline 216 \end{array}$$

Explain the error. The person who solved this problem did not add the 5 that was carried (regrouped) into the tens place.

- b. There is a mistake in the way this math problem was solved.

$$\begin{array}{r} 5 \\ 86 \\ \times 7 \\ \hline 616 \end{array}$$

Solve the math problem correctly.

$$\begin{array}{r} 4 \\ 86 \\ \times 7 \\ \hline 602 \end{array}$$

Explain the error. The person who solved this problem made a mistake when multiplying the numbers in the ones column.  $6 \times 7 = 42$ , not 56. They should have written a 2 in the ones place and carried (regrouped) the 4.
