WA #6- 3D Choice Project

Before school closed for Covid, we were going to have a 3D art unit in school. Building off of our drawing and painting foundational skills, pick a project option listed below, working with objects and/or 3 dimensional media!

The artwork to the right is floating on water! I remember my 8th grade art teacher showing this to our class for the first time and it changed my perception of art forever- *anything can be an "artist's canvas" and art can be temporary!*

This artwork is by Land Artist, Andy Goldsworthy. The green objects are iris (flower) leaves pinned together with thorns and the red objects are rowan berries that fill select shapes created by the leaves. It all floats on the water! So surreal!

Something else that was a bit surreal- who else witnessed the craze of the toilet paper shortage!? Hopefully you have some extra toilet paper tubes or any cardboard laying around! (Cereal boxes, tissue boxes, packages) Let's get creative and put that found cardboard to good use!

Do what you can and...
Explore at your own
pace...

Vocabulary-

- ★ **3D**- 3 dimensional, not flat, art element of form
- ★ **Sculpture**- an artwork that shows form/is 3 dimensional, it takes up space/volume
- ★ **Assemblage**- a technique for constructing a sculpture by adding many pieces together that act as one
- ★ **Installation**- artwork that is constructed in a certain place and is usually temporary, ex: Land Art
- ★ **In the Round**- when a sculpture looks pleasing and complete in all 360 degrees
- ★ **Appropriation**: *“is the intentional borrowing, copying, and alteration of existing images and objects.”* An artist must appropriate (or change) someone else’s image enough to make it *their own*, otherwise this is plagiarism of an image, such as plagiarism of writing in ELA.
