

Algebra 2 Regents Review Work—Mr. Ceccato and Mr. DeVantier

****MAKE SURE YOU HAVE THE YELLOW ALGEBRA 2 REVIEW PACKET****

First, we hope that you and your family are healthy. We have no idea what the future holds but we are positive that you will never forget the 2019-20 school year!

This page contains Regents exam review questions that cover lessons 1-66. There might be some material in here that falls within these lessons but has not been covered yet, so don't worry about that. This is work that would have/will be done at the end of the year, so doing some of this now will help lighten your load later on. If and when we return to school, we will be going over this work in preparation for the Regents exam in June. You are free to write in the booklets—they are yours.

The exams are broken down by module, or unit. You will notice that there are A LOT of questions from material from the beginning of the year. You should also note that there are questions on these exams that are not listed as they are from material we have not gotten to yet.
