GCOLANGELO@NFSCHOOLS.NET**

**ATTACHED BELOW IS A RESEARCH REPORT ON THE HISTORY OF CAREERS.
PLEASE ANSWER THE FOLLOWING QUESTIONS AND EMAIL ME YOUR FINAL
REPORT**

NAME _____ DATE _____

CAREER HISTORY: STATE YOUR TOPIC

The History must be two pages (double-spaced, font size 12) written in essay form (no lists), and a picture page. Include the following:

- ❖ **History of Career**—Look to the origin; when the need for the job/career first came about (for example, the origins of a pastry chef go back in time to the first clay oven and the making of bread dough during the Iron Age).
 - Background information—Be specific; write about what you learn from researching the origins and the progress of the job/career over time.
 - How it got started—and why.
 - Where it has been—Include where the career originated, places it flourished and evolved.
 - How has it changed/evolved—How has industrialization, technological discoveries shaped the career.
 - Working conditions over the course of career history: Choose a period of time when it was very different from how it is currently. What was it like to work on the job 50, 100 yrs ago? And research well so that you can give the following--
 - Pros
 - Cons

Don't spend time on comparing it to your career today, but you can note the *contrast* between your career at different times in the course of its history. Do NOT plagiarize!

Report should be one page typewritten and a page of pictures showing how the equipment, style and concept of the career selected has evolved over time (timeline)
