

# ABC Song

## Primary Objectives

- 4. Demonstrates traveling skills
- 8a. Comprehends language

## Why It's Important

Children love to sing and move in various ways, and some even learn best through music and movement. Singing the ABCs in a variety of ways will help your child become more familiar with the alphabet and enjoy learning it.

## Materials

None

## What You Do

1. Before beginning, think about different ways in which your child could move and sing the ABC song.
2. Invite your child to sing the ABC song in various ways: loudly, in a whisper, in a high voice, in a low voice, etc.
3. Encourage her to move in a variety of ways as she sings: while tiptoeing, stomping, clapping, etc. *Can you sing the song and stomp your feet as you sing? Let's see if you can sing it loudly while you stomp!*
4. Observe how much of the song your child can sing, and sing along, if needed.
5. Invite your child to march along to the ABCs as you transition to the next part of your day. For example, she could march to the kitchen for lunch or toward the door to put on her coat.
