? ESSENTIAL QUESTION

How can you find the areas of parallelograms,
rhombuses, and trapezoids?

EXPLORE ACTIVITY COMMON CORE 6.G.1

Area of a Parallelogram

Recall that a rectangle is a special type of parallelogram.

A Draw a large parallelogram on grid paper. Cut out your parallelogram.

B Cut your parallelogram on the dashed line as shown. Then move
the triangular piece to the other side of the parallelogram.

height *(h)*   base *(b)*   →   length *(l)*   width *(w)*
C What figure have you formed? _____

Does this figure have the same area as the parallelogram? _____

base of parallelogram = _____ of rectangle

height of parallelogram = _____ of rectangle

area of parallelogram = _____ of rectangle

What is the formula for the area of this figure? $A =$ _____

or _____

D What is the formula for the area of a parallelogram? $A =$ _____

Math Talk

How is the relationship
between the length and width
of a rectangle similar to the
relationship between the
base and height of a
parallelogram?

Area of a Parallelogram

The area *A* of a parallelogram is the
product of its base *b* and its height *h*.
$$A = bh$$

h   *b*

Reflect

1. Find the area of the parallelogram.
$A = $ _____

7 cm

14 cm

Finding the Area of a Trapezoid

To find the formula for the area of a trapezoid, notice that two copies of the same trapezoid fit together to form a parallelogram. Therefore, the area of the trapezoid is $\frac{1}{2}$ the area of the parallelogram.

h

b

The height of the parallelogram is the same as the height of the trapezoid. The base of the parallelogram is the sum of the two bases of the trapezoid.
$A = \quad b \quad \cdot h$

$A = (b_1 + b_2) \cdot h$

Area of a Trapezoid

The area of a trapezoid is half its height multiplied by the sum of the lengths of its two bases.

$A = \frac{1}{2}h(b_1 + b_2)$

b_1

h

b_2

EXAMPLE 1 Real World

COMMON CORE 6.G.1

A section of a deck is in the shape of a trapezoid. What is the area of this section of the deck?

$b_1 = 17 \qquad b_2 = 39 \qquad h = 16$

Use the formula for area of a trapezoid.

$A = \frac{1}{2}h(b_1 + b_2)$

$= \frac{1}{2} \cdot 16(17 + 39)$ Substitute.

$= \frac{1}{2} \cdot 16(56)$ Add inside the parentheses.

$= 8 \cdot 56$ Multiply $\frac{1}{2}$ and 16.

$= 448$ square feet   Multiply.

17 ft

16 ft

39 ft

2. Another section of the deck is also shaped like a trapezoid. For this section, the length of one base is 27 feet, and the length of the other base is 34 feet. The height is 12 feet. What is the area of this section of the deck? $A =$ _____ft²

Finding the Area of a Rhombus

A **rhombus** is a quadrilateral in which all sides are congruent and opposite sides are parallel. A rhombus can be divided into four triangles that can then be rearranged into a rectangle.

The base of the rectangle is the same length as one of the diagonals of the rhombus. The height of the rectangle is $\frac{1}{2}$ the length of the other diagonal.
$A = b \cdot h$
$A = d_1 \cdot \frac{1}{2}d_2$

Area of a Rhombus

The area of a rhombus is half of the product of its two diagonals.

$A = \frac{1}{2} d_1 d_2$

EXAMPLE 2 Real World

COMMON CORE 6.G.1

Cedric is constructing a kite in the shape of a rhombus. The spars of the kite measure 15 inches and 24 inches. How much fabric will Cedric need for the kite?

To determine the amount of fabric needed, find the area of the kite.

$d_1 = 15$ $d_2 = 24$

Use the formula for area of a rhombus.

$A = \frac{1}{2}d_1 d_2$

$= \frac{1}{2}(15)(24)$ Substitute.

$= 180$ square inches Multiply.

15 in.

24 in.

YOUR TURN

Find the area of each rhombus.

3. $d_1 = 35$ m; $d_2 = 12$ m

$A =$ _____ m²

4. $d_1 = 9.5$ in.; $d_2 = 14$ in.

$A =$ _____ in²

5. $d_1 = 10$ m; $d_2 = 18$ m

$A =$ _____ m²

6. $d_1 = 8\frac{1}{4}$ ft; $d_2 = 40$ ft

$A =$ _____ ft²

Guided Practice

1. Find the area of the parallelogram. (Explore Activity)

$A = bh$

$= ($ _____ $)($ _____ $)$

$=$ _____ in²

9 in.
