## Version 1: Coupons and Rebates

1. Jonathan bought 10lb of flour at \$7.50. He had a store coupon for \$0.79. What was the final price for the flour?
2. Juanita plans to purchase a 50 fl. oz. shampoo at \$15.10. She has a \$2.15 coupon off from the store. What is the final price for the shampoo?
3. You want to purchase a 1-liter bottle of vegetable oil at \$2.10, a 100-oz orange juice at \$4.50, 2-liter bottle of milk at \$3.50, 250ml of cream at \$2.60. You received a \$1.50 rebate peanut butter and had a store coupon for \$0.84 off each item. If you are supposed to pay a 6.75% sales tax on the final price, how much will you pay?
4. A Christmas promotion included a \$2.5 mail-in rebate for the purchase of a 10-liter bottle of milk and a store coupon for \$1.39 off a 5-liter bottle of vegetable oil. Jesse Gatling bought one 10-liter bottle of milk for \$33.00 and a 5-liter bottle of vegetable oil for \$26.89. Calculate his total cost if an envelope costs \$0.10 and a stamp costs \$0.28.
5. An Apple iPod sells for \$781.29 and has a mail-in rebate for \$55.00. Determine the cost after the rebate if an envelope costs \$0.13 and a stamp costs \$0.40.
6. You buy a printer for \$79.80 and a scanner for \$67.10; you receive a \$11 mail-in rebate for the printer and a \$17 mail-in rebate for the scanner.
  - a) If each envelope costs \$0.15 and each stamp costs \$0.37, calculate the total cost after the rebates.
  - b) How much is the actual rebate after your expenses?
