

Sight Word Game

My Pile - Your Pile

Directions:

This is a "flash card" game. As you flash the cards to your child, if they correctly identify the word within 3 seconds, the card is placed in their pile. If they provide an incorrect response, tell them the word and place the card in front of you. At the end, your child's pile should be bigger than your pile and your child WINS the game!

Helpful Tips:

- Your child should always be looking at the first letter of the word first.
- Do not allow time for your child to "sound out" the word. We are looking for automatic recall.

Variations:

- Identify the word within 2 seconds
- Graph your child's progress so they can see how many more words they can identify over time
- Compete with siblings or friends
