 Study the picture and answer the questions below...Use the website for help.

Analyzing an Ecosystem

Can you find ...

1. ... all of the biotic components?
2. ... all of the abiotic components?
3. ... an example of an interaction between an abiotic and a biotic component?
4. ...an example of a producer?
5. ... an example of consumer?
6. ...an example of parasitism(one organism, the parasite, lives on or in another organism, the host, causing it some harm)?
7. ...an example of mutualism(mutual benefit for two organisms)?
8. ...an example of commensalism(an association between two organisms in which one benefits and the other derives neither benefit nor harm)?
